bellows

Confidence, before the push.

Run GitHub Actions locally.

A practical tool. A closer feedback loop.

INSPECT / DIAGNOSE / RUN

Keep the feedback close.

Bellows brings existing GitHub Actions workflows into the local development loop using act and Docker. Developers can inspect the plan, diagnose compatibility, and catch failures before pushing.

THE CHARACTER

Capable, approachable, and direct. The personality lives in confident type, a warm signal color, and the rhythm of the folds.

01

Clear by default

Name the action. Make the next step easy to find.

02

Warm, with restraint

Use color and language to make a technical tool feel approachable.

03

Honest about limits

Local feedback supports the workflow. Hosted CI still provides platform coverage and merge enforcement.

One identity. Every context.

PRIMARY LOCKUP

ON A DARK SURFACE

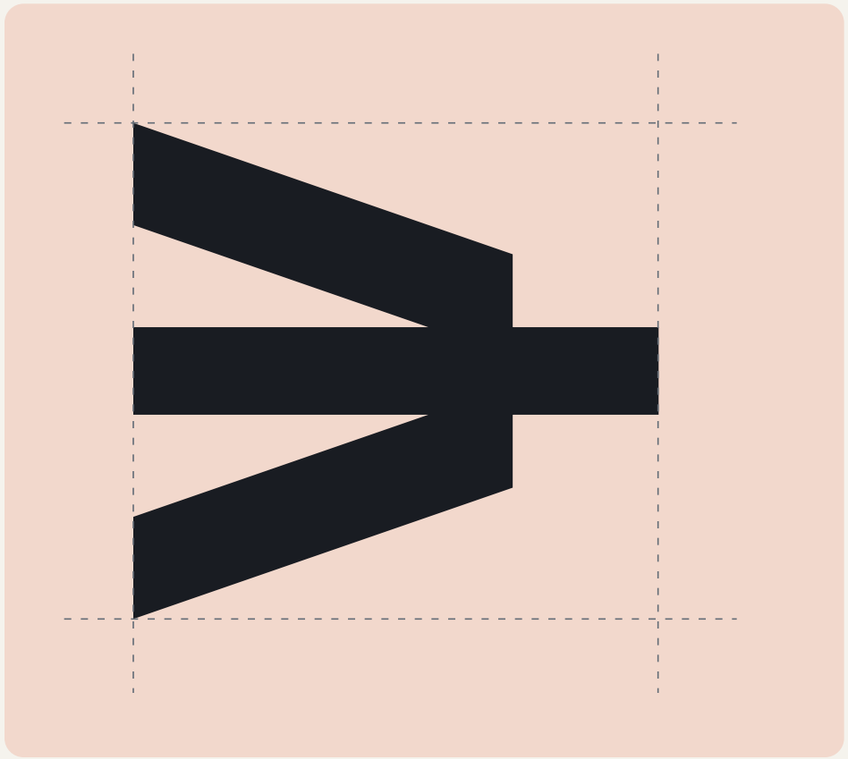

ONE COLOR

The three folds converge into an air outlet: a compact symbol of a bellows and a shorter feedback loop.

A mark that works small.

CLEAR SPACE / 1/4 OF SYMBOL HEIGHT

Keep the clear space around the full visible lockup. Preserve its geometry, orientation, and spacing.

DIGITAL MINIMUMS

Symbol: 16 px high

bellows

Lockup: 160 px wide

Use the tile for app and community avatars.

Use the supplied light, dark, and one-color artwork. Keep backgrounds quiet. Avoid extra effects and decorations inside the mark.

A warm signal. A quiet base.

Use Paper and Ink for most of the composition. Let Ember carry one point of emphasis.

Ink	Paper	Ember	Clay	Steel
#191C22	#F5F3ED	#F06A43	#F2D8CC	#626B75
Primary text / dark surface	Light surface	Brand signal / key action	Soft supporting surface	Secondary text on Paper

TEXT PAIRINGS / CALCULATED SRGB CONTRAST

15.4:1
Ink on Paper

5.6:1
Ink on Ember

5.9:1
Burnt Ember on Paper

Use #A9361C for accent text on light surfaces. Use Paper and #BBC2CA for text on Ink.

Status colors: success #2C6B50, warning #805B00, error #B23635. Add a visible status label.

PRIMARY / SPACE GROTESK

Useful, with a little character.

Distinctive letterforms for the identity. A clear hierarchy for everything around it.

HIERARCHY / SIZE, LINE HEIGHT, WEIGHT

Display	64 / 68 / 600	Keep the feedback close.
Heading	32 / 38 / 600	Inspect the plan.
Body	16 / 26 / 400	Your workflows, run locally.

JETBRAINS MONO

```
$ bellows doctor

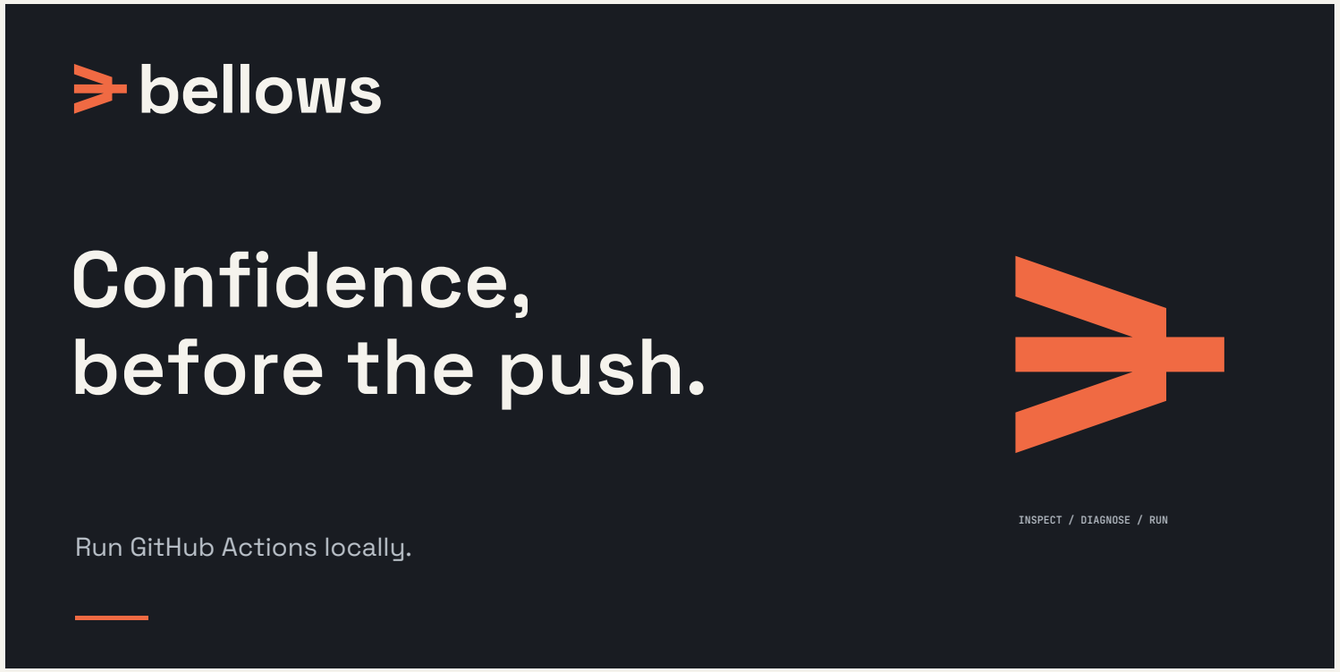

$ bellows run
```

THE SYSTEM

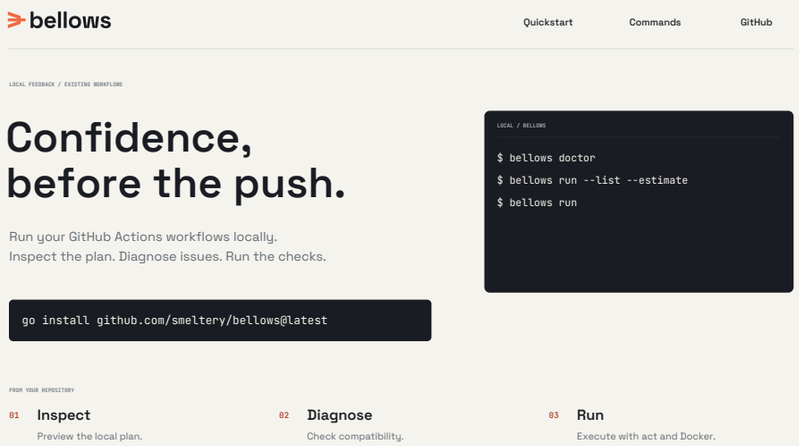

Space Grotesk 400-700 for identity, headings, and body. JetBrains Mono 400-500 for commands and data.

The same system, put to work.

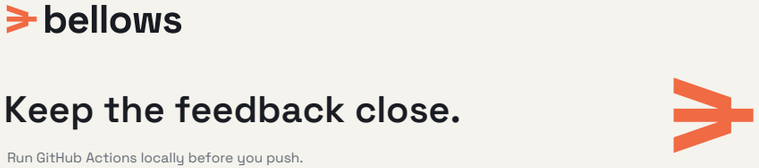

SOCIAL PREVIEW / 1280 X 640

DOCUMENTATION CONCEPT / 1600 X 900

README BANNER / 1600 X 480

AVATAR / FAVICON

Same mark. Same type. Same signal.

Personality in the right places.

PRIMARY LINE

Confidence, before the push.

SECONDARY LINE

Keep the feedback close.

PRODUCT DESCRIPTOR

Run GitHub Actions locally before you push.

Speak plainly in commands and diagnostics. Name the limitation and give a useful next step. Keep claims about compatibility and performance specific.

A COMPLETE WORKING KIT

Identity artwork

Outlined SVG lockups, wordmarks, symbols, app tile, transparent PNGs, and favicon sizes.

Foundations

Font files and licenses, CSS variables, JSON tokens, palette, and usage rules.

Applications

Social preview, README banner, documentation concept, and a responsive local brand guide.
